01

Who we are

TAAQ Studio is a design and fit-out studio founded and led by Mohamed Wahba — a “taaQ” is the architectural arch that carries the roof and ties a space together. Practising since 2014 — first in Egypt across design, fit-out and furniture production, and since 2024 in Saudi Arabia's Eastern Province on large residential, office and education projects.

We work with homeowners, contractors, consultants and developers as a technical partner: we design, draw, coordinate and follow the work on site — and we like every decision to be documented.

12+

years in practice

15

projects in the portfolio

16

schools in one programme

2

countries on the ground

02

What we do

Architectural design

Concepts, plans, elevations and 3D for villas and buildings.

Technical office

Shop drawings, submittals, quantity take-off, coordination and minutes.

Fit-out & interiors

From shell to handover: materials, lighting, joinery and every detail.

Supervision

Site follow-up so what was drawn is what gets built, through handover.

03

How a project moves

01

Brief

Needs, budget and site.

02

Design

Concept, plans and 3D.

03

Detailing

Shop drawings, submittals, approvals.

04

Build

Supervision and daily coordination.

05

Handover

Snagging and full records.

Technical office for contractors

We can be your technical office without you hiring a full team — issuing sheets in the project's numbering system and chasing approvals until they close.

- Architectural shop drawings — GA plans, finishes, reflected ceilings, doors & partitions, details
- Submittal preparation and tracking against consultant comments
- Quantity take-off and finish schedules
- Cross-discipline coordination (structure, MEP, precast)
- Minutes, RFIs and project documentation
- Light web tools on the project's own data so the team sees each submittal's status live

Selected experience

16-school programme — Eastern Province, KSA

Contractor's technical office · architectural shop drawings, submittals, permits · 2026

Residential & office complex — Al-Khafji, KSA

Founder of the contractor's technical-office team (Kharafi) · shop drawings and coordination · 2025–26
